# Deloitte.

EU AI ACT – TRAINING FOR DECISION-MAKERS

ABOUT THE TRAINING

- The EU AI Act is a comprehensive, legally-binding framework that applies to most AI solutions deployed in the EU.

- EU companies using in-scope AI solutions need to be compliant with the mandatory AI Literacy requirement, applicable from 2 February 2025.

- With AI adoption increasing and AI Act implementation underway, understanding its implications is crucial for decision-makers.

- This e-learning will equip decision-makers with the essential knowledge and insights to navigate the AI Act.

- A case study of a private company adopting AI brings the Act and its impact to life, ensuring an engaging learning experience.

WHO IS THIS TRAINING FOR?

- Decision-makers at private corporations developing or deploying AI systems.

WHAT WILL YOU LEARN?

LEARNING OBJECTIVES

Understand the fundamental principles and scope of the EU AI Act

Recognise the different AI system risk categories and their corresponding compliance requirements

Identify some key considerations for AI strategy and governance within your organisation

KEY AREAS OF FOCUS

- ✓ **Core components:** Delve into the Act's foundational elements, including its definition of AI, approach to regulating the AI supply chain, and its risk-based approach to AI systems.

- ✓ **High-risk AI system requirements:** Understand the key requirements for developing and deploying high-risk AI systems.

- ✓ **Extraterritoriality:** Explore the Act's reach beyond the EU.

- ✓ **Interplay with other regulations:** Examine how the Act interacts with other relevant regulations.

- ✓ **Timelines:** Understand the AI Act's key compliance milestones.

- ✓ **Strategic considerations for decision-makers shaping and challenging AI strategies.**
