

Main pressures weighing down **Primary Care today**

In 2015 **patient satisfaction**

with GP services was...

69%

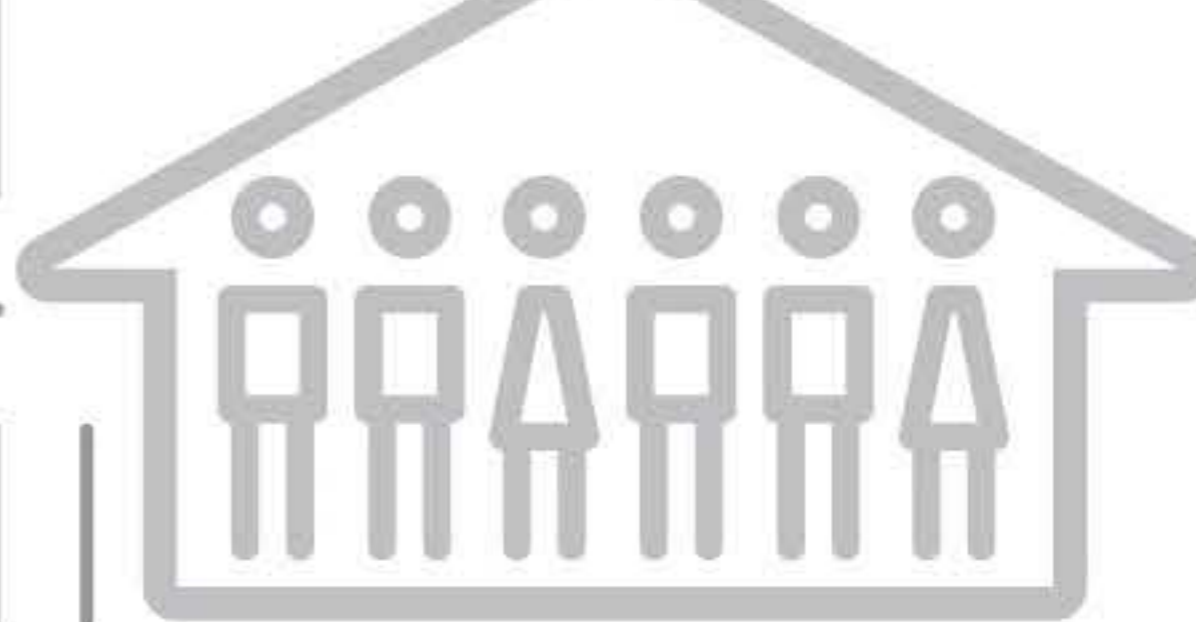

lowest since reporting started in 1983

10-15%

Demand for GP consultations

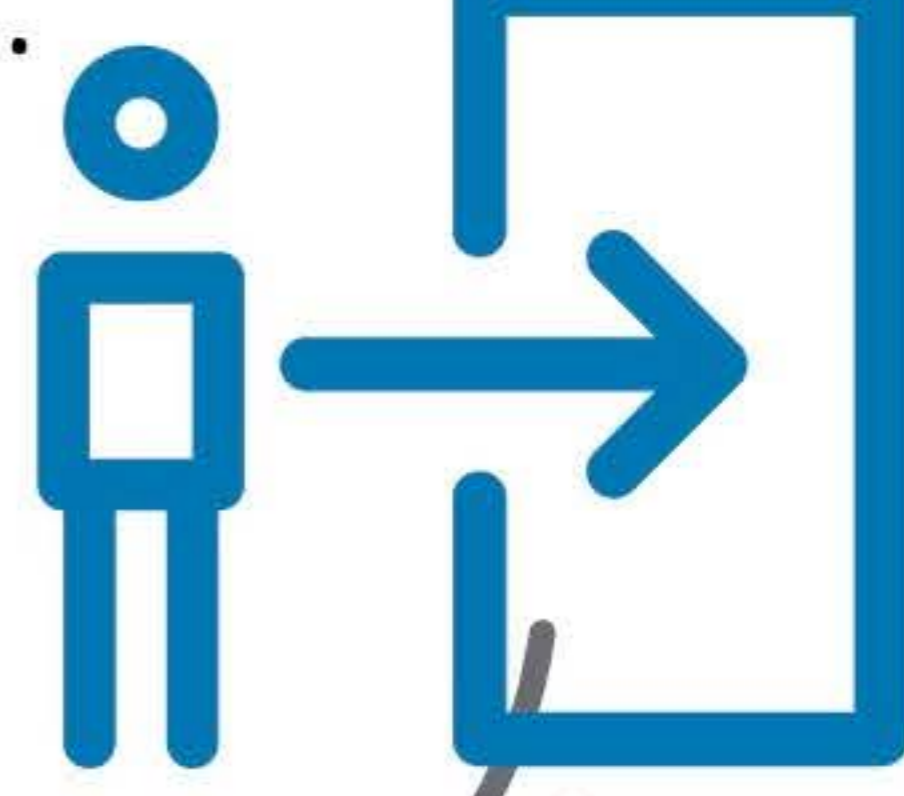

has increased by

...in the past 5 years

Staff shortages with up to...

60%

of GPs reporting plans to leave

Squeezed funding

NHS spending allocated to general practice has dropped to

6.86%

2015/16

Estate investment

Only one quarter of GP practices across the country currently occupy modern purpose-built premises

Recommendations to ensure **Primary Care** is sustained for **tomorrow**

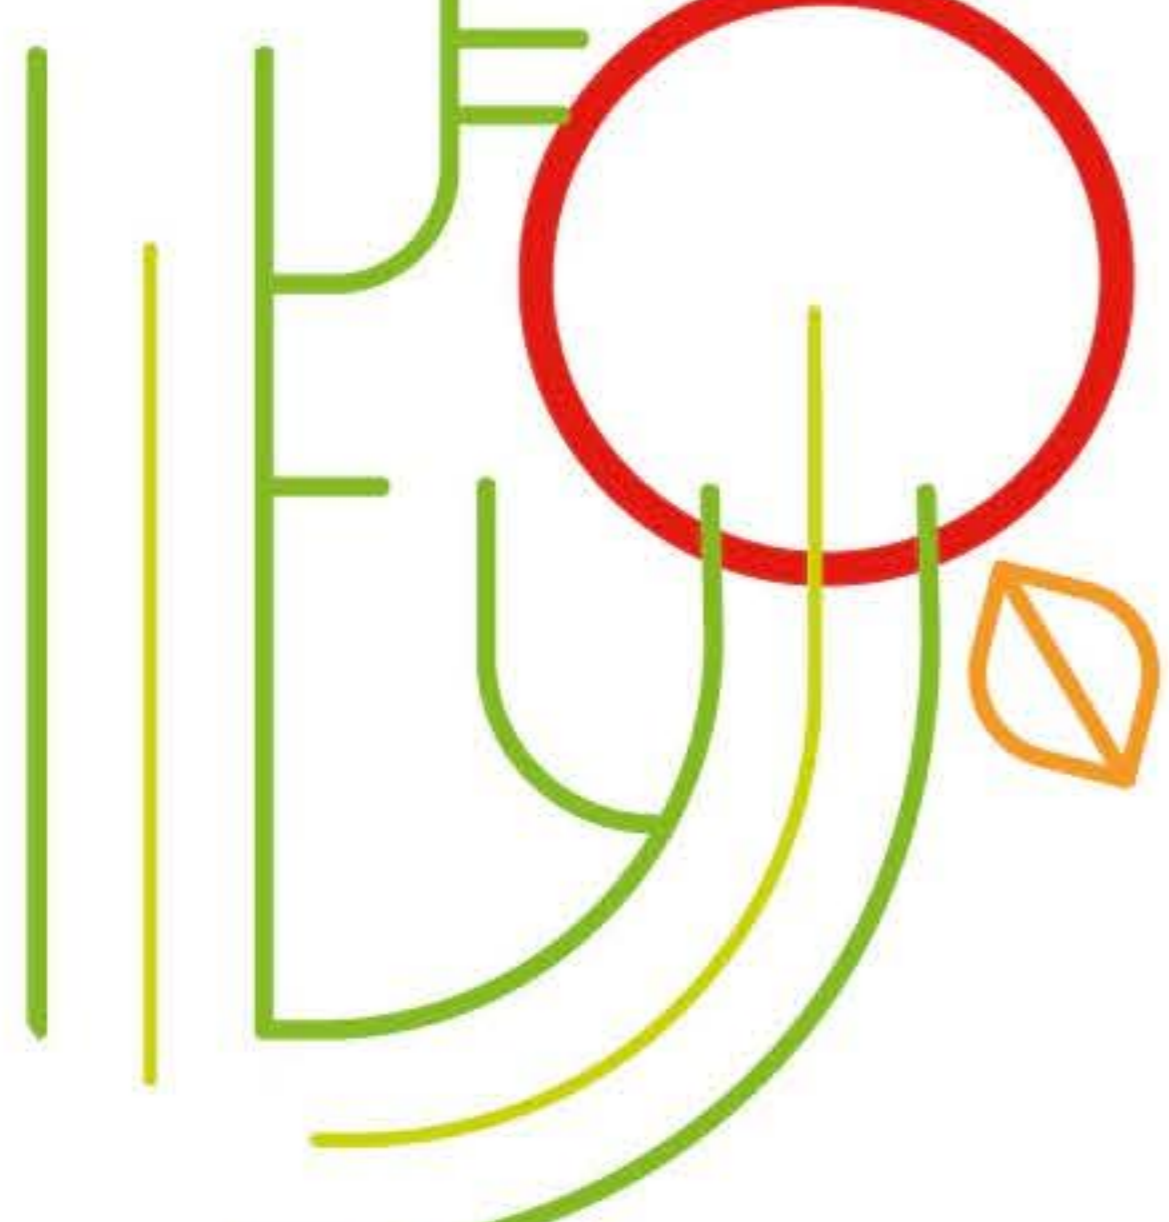

Securing adequate funding

for general practice equivalent to...

10%

or more of the overall healthcare budget

Strengthening the primary care estate and supporting the use of digital technologies

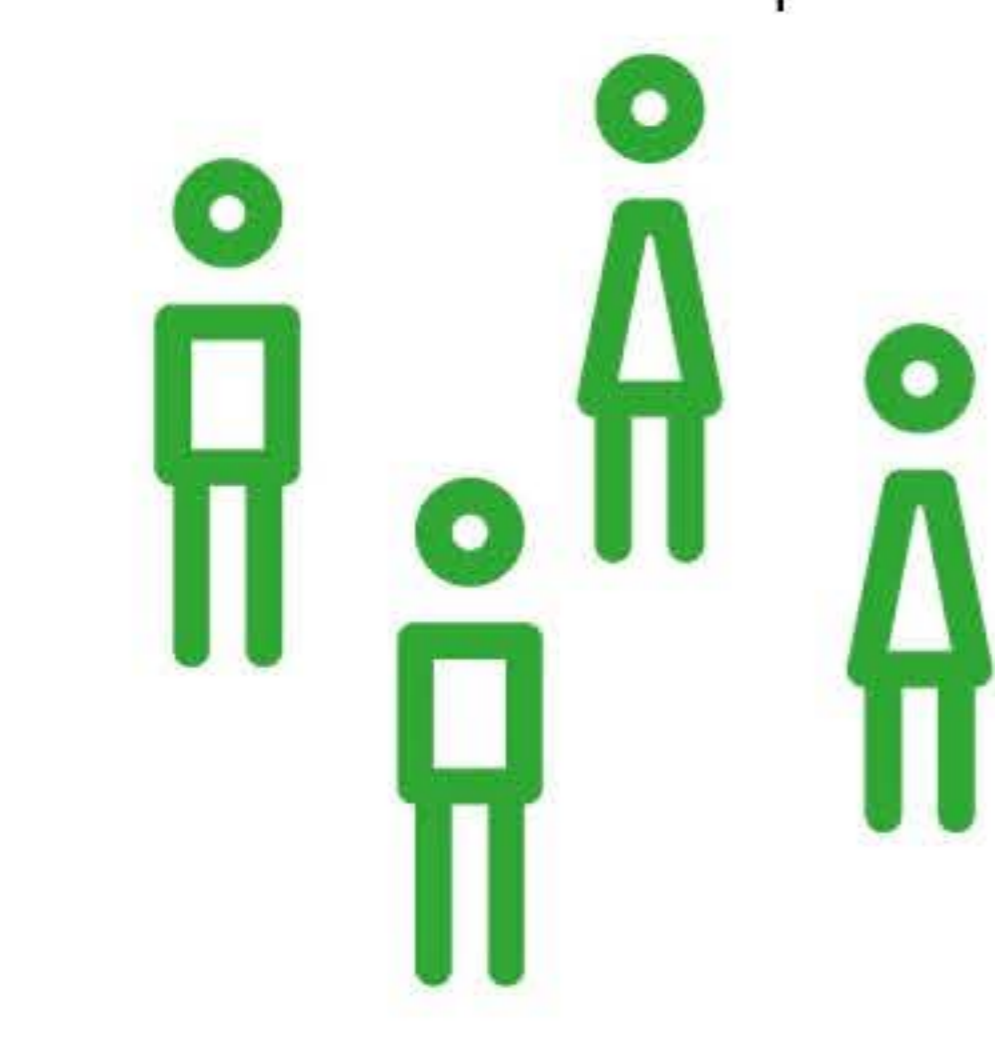

Collecting better activity and performance data

to optimise design of primary care services and workforce planning

Developing primary care workforce strategies

that improve recruitment and retention processes

Improving people's health literacy

to increase responsible use of primary care services
