Family business technology transformation, 2026 — Key Takeaways

The family business insights series

Foreword

Welcome to the *Family business technology transformation* report, part of Deloitte Private's *Family business insights series*. This series includes five reports that delve into: the evolution and character of the family business landscape globally; cybersecurity; technology transformation; succession planning and the next generation; and words of advice from leading family business executives.

This report provides insights into the ways family businesses are undergoing digital transformation, including the digital technologies they are using, extent of operational use, and perceptions of value from their technology use.

To identify these insights, we surveyed senior executives from 1,587 family businesses worldwide between March and June 2025, with each having a minimum revenue of US\$100 million and the families owning a controlling (51%+) share of the company.

In 2024, these businesses generated an average revenue of US\$2.8 billion and collective revenue of US\$4.4 trillion. We also conducted in-depth interviews with 30 senior family business executives, many of whom are the heads of multi billion dollar families and 100+ year old family businesses. These interviews offer invaluable insights and advice that can help family businesses navigate the playing field and plan for long-term success.

We hope these insights prove useful in shaping technology planning for your family business, and we would like to offer a heartfelt thank you to the participants who generously shared their time and perspectives.

Kind regards,

Key takeaways

Eyeing risk, family businesses turn to technology

Nearly half (48%) of family businesses are currently either rolling out (41%) or developing (7%) a technology strategy to strengthen their operations. This comes as roughly half report they are only moderately (37%) or insufficiently (11%) invested in the operational technology they need to support their operations now and in the future, and 51% rank inadequate technology adoption as a moderate/high risk to their business.

Technology transformation is widespread, but piecemeal

Family businesses are adopting technology across a wide array of areas, with the most popular being in their operations (to streamline/automate processes), finance and accounting, IT, cybersecurity, and research and development functions. That said, their implementation is often described as “partial” rather than “full,” reflecting a cautious, gradual approach to digital transformation.

AI goes mainstream

With an 86% adoption rate, AI technology is becoming robust and enterprise-wide. At the forefront of in-demand AI applications are process efficiency (40%), risk mitigation (39%), and customer relationship management (CRM) (39%).

Challenges afoot on the adoption front

The core challenges family businesses face when adopting new technology relate to market conditions (e.g., economic uncertainty, competition pressures), financial constraints, privacy concerns, and trust concerns with external vendors/consultants, with each ranking as a primary challenge among nearly a third of respondents.

Technology breeds value creation

Most family businesses report that their investment in technology has delivered value across a variety of fronts, such as improving efficiency (with 96% reporting moderate/significant value creation), productivity (95%), decision-making (95%), risk management (95%), competitiveness (94%), and cost savings (94%).

Deloitte.

Private

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited (DTTL), its global network of member firms, and their related entities (collectively, the “Deloitte organization”). DTTL (also referred to as “Deloitte Global”) and each of its member firms and related entities are legally separate and independent entities, which cannot obligate or bind each other in respect of third parties. DTTL and each DTTL member firm and related entity is liable only for its own acts and omissions, and not those of each other. DTTL does not provide services to clients. Please see www.deloitte.com/about to learn more.

Deloitte Private is the brand under which firms in the Deloitte network provide services to privately owned entities and high-net-worth individuals.

Deloitte provides leading professional services to nearly 90% of the Fortune Global 500® and thousands of private companies. Our people deliver measurable and lasting results that help reinforce public trust in capital markets and enable clients to transform and thrive. Building on its 180-year history, Deloitte spans more than 150 countries and territories. Learn how Deloitte’s approximately 460,000 people worldwide make an impact that matters at www.deloitte.com.
