

THE AI IMPERATIVE

Advanced cognitive solutions are the connective tissue between **data, insight, and action**

THE CHALLENGES OF AI ADOPTION

AI maturity is becoming the basis for competitive edge. The cloud offers readily accessible, pre-trained or self-learning machine learning (ML) models capable of delivering significant business value—whether in the service of customer acquisition or new AI-enabled business models.

However, organizations struggle with a number of challenges when integrating these AI capabilities on their own:

Difficulty identifying or prioritizing use cases

Lack of internal alignment on strategy

Challenges scaling from prototypes to production

ALL IN THE CLOUD

Deloitte and Google Cloud's Accelerate AI offerings help clients create a unified cloud AI foundation using Google Cloud's Vertex AI, a managed ML platform, and Deloitte's proven domain knowledge and AI operationalization experience.

AI GARAGE

An innovative Deloitte delivery model to jumpstart enterprise AI implementations

AI LAB

An interactive environment for understanding, identifying, and prioritizing AI use cases

AI STRATEGY

A comprehensive assessment of what AI talent, technology and operations is needed to become an AI powered organization

RAPID BREAKTHROUGHS ACROSS THE AI LIFECYCLE

New solution discovery

Greater stakeholder engagement

Increased strategic clarity

Rapid prototype development

Faster integration and scaling

Business outcomes in 4-6 week

ACCELERATE THE AI MATURITY JOURNEY

Define the possible

- Explore success stories
- Clarify objectives
- Assess maturity
- Identify stakeholders
- Flag potential barriers

Disrupt old thinking

- Design thinking
- Uncover possibilities
- Explore exponential technologies

Enhance the vision

- Assess requirements and capabilities
- Determine use cases
- Consider additional organizational enablers

Create the plan

- Formalize deliverables
- Ignite interest
- Message stakeholders
- Establish ownership

Build and scale

- Build cloud and data AI platforms
- Develop and deploy AI solutions
- Develop ML ops capabilities
- Govern AI initiatives
