ZORA AI™ BY DELOITTE: *DAWN OF A NEW DIGITAL WORKFORCE*

The third wave of AI, known as agentic AI, is here and is poised to help organizations transform foundational business models and enable new ways of working, operating, and delivering value. Imagine elevating the productivity of your workforce while unlocking new business value, growth, and innovation. By integrating advanced AI agents, you can streamline processes, reduce inefficiencies, and empower your employees to focus on strategic activities.

Autonomous agents for smarter enterprise operations

Zora AI™ by Deloitte, built on NVIDIA AI, offers a new digital workforce, comprised of specialized AI agents, that can autonomously execute complex business functions with speed and accuracy. Designed to transform your decision-making experience with real-time insights, these on-demand digital agents are ready for work.

Zora AI agents are intelligent digital workers with deep functional and industry-specific knowledge that emulate human decision-making and reasoning. They help simplify enterprise operations, boost productivity and efficiency, and drive more confident decision making that unlocks business value.

Zora AI is available for rapid deployment across these capabilities:*

Finance

Sourcing and procurement

Sales and marketing

**Additional portfolios on the roadmap include: Supply Chain; Human Capital; Customer Service; Operations; Engineering IT; Tax; Audit*

Architected with Deloitte's Trustworthy AI™ principles, Zora AI offers security, transparency, and reliability and includes a human feedback loop to help instill confidence in the accuracy and quality of its insights and recommendations.

The unique edge of Zora AI agents

Imagine pairing your human workforce with a digital workforce that operates globally, 24/7, and brings extensive domain-specific intelligence to execute a wide range of tasks, including:

Source, extract, and interpret real-time, multi-modal data from structured and unstructured sources.

Run the analytical and mathematical models to define related insights and trends.

Translate insights into easy consumable formats, while providing scenario analysis and recommendations to help advise on business-critical decisions.

Coordinate and perform a set of actions—in collaboration with other agents—to execute complex, nuanced workflows, from beginning to end, including transaction processing, anomaly detection and resolution, and self-healing.

PERCEIVE | REASON | ACT

Zora AI combined with HPE Private Cloud AI

HPE Private Cloud AI, which includes pre-integrated NVIDIA AI Enterprise software and accelerated computing, offers a turnkey, fully integrated system that simplifies the AI lifecycle, from training to inferencing.

This can help:

Streamline deployment of AI models

Accelerate AI initiatives

Achieve faster time to value

Overcome barriers to scaling AI

Leveraging HPE Private Cloud AI provides a cloud experience that keeps data private. It can be deployed on-premises or via a co-location provider and is designed for hybrid environments, providing flexibility and modularity with cloud technologies, economics, and scalability. Multi-layered controls also protect data and models and maintain performance and reliability of AI infrastructure.

Deloitte's industry insights and ecosystem, combined with HPE's leading technology, provide a tailored AI solution across various industry use cases. This supports rapid innovation and addresses sector-specific challenges with customized frameworks, models, and workflows.

Transforming decision-making and operations with Zora AI for Finance

Zora AI for Finance draws upon Deloitte's extensive experience in the business finance function to help transform decision-making and operations and can be integrated with HPE Private Cloud AI. Its portfolio of capabilities include: CFO Insights; Working Capital; Sales and Profitability; Expense Management; Invoice Management; Data Management; Cash Application; and Automated Accounting.

CFO Insights addresses critical workflows in the finance lifecycle, including expense and invoice management, sales and performance trends, optimization of working capital requirements, and more. These specialized digital agents can complete complex tasks and provide on-demand insights, analysis, reporting, workflow automation, decision support and data sourcing.

With CFO Insights, financial executives can analyze, monitor, and react to business performance in real-time with agents to tell them what they need to care about today and tomorrow.

Deloitte and HPE: Fast forward your AI journey

Deloitte, in collaboration with HPE and NVIDIA, leverages the expertise of thousands of developers and AI practitioners to bring innovative ideas to life. Together, we help clients deploy value-added AI workloads on premises, accelerating innovation and addressing sector-specific challenges. By expanding on-premises and co-location AI services with HPE Private Cloud AI, we can enhance resiliency, reduce costs, and eliminate data silos, allowing for improved security and control.

Get started

Welcome to the dawn of a new digital workforce era. When you're ready to transform your boardroom decision-making experience with intelligent digital business agents interacting in real time, we're here to help you make it a reality.
