RelativityOne Self-Service

Powered by Deloitte

The Challenge

You want to use the leading eDiscovery Platform RelativityOne, but also want it pre-configured and ready for action. You need a Relativity integrator that can offer you:

Ability to process and maintain control of your data

Flexibility to scale the environment up or down based on usage

A platform that can be leveraged for both internal investigations and legal review

Integrated accelerators and templates that enhance capabilities

On-call support that knows your processes

A predictable cost model based on total volume, not transactions

A team to support you by proactively identifying additional opportunities for success such as potential data or work-product reuse, trends in data population, or key performance indicators

RelativityOne Self-Service Powered by Deloitte integrates software as a service with enhanced support across the spectrum of regulatory, compliance, and litigation events. Organizations benefit from a secure, powerful, mature, and adaptable solution without having to rely on multiple vendors or technology-only providers. Our Self-Service solution gives you control of your data, while still having the support of Deloitte when you need it.

The Deloitte and Relativity Joint Solution

RelativityOne Self-Service Powered by Deloitte offers clients a scalable, end-to-end, and secure cloud-based eDiscovery platform with integrated proprietary accelerators. This approach provides the ability for your team to manage and maintain control of your matters, data, and cost. Self-Service clients receive access to Deloitte's 24/7/365 client support as needed.

Self-Service Solution Highlights

Monthly Subscription Service: A monthly subscription model with transparent and predictable pricing that scales up or down based on the volume of data stored across all matters vs. the traditional "Pay-as-you-go" model where costs are accrued based on fluctuating factors.

Deloitte Accelerators: Access to a suite of over 15 applications (e.g., assisted redaction, assisted translation, search term assistant, NavigAite™) developed by Deloitte that can be embedded into RelativityOne to help clients deal with situations that require customized capabilities, including Deloitte workspace templates and a menu of scripts.

Program Management: Deloitte helps you drive consistency and value through cost predictability across matters. It provides activity reporting across the portfolio including review rates, key performance indicators (KPIs), data trends, metrics, and analytic report differences.

Portfolio Management: A master repository allows you to reuse previously collected and processed data and work product, thereby potentially reducing risk, saving money, and enabling efficiencies across the portfolio. It allows for advanced Early Case Assessment (ECA) of data in the master repository that is easily promoted to a dedicated review workspace. New matters can also leverage previously applied coding, custom de-duplication, and work product tracked back to the original documents in the master repository.

Analytics: Access to leading analytics capabilities within Relativity and the use of Generative AI. Analytics capabilities include cluster wheel; communication-conversation; thread analysis; metadata dashboards; transparent concept search; entity extraction (people, places, and things); phrase; and multi-concept identification depending on the use case.

Access to Additional On-Demand Services: If you need assistance beyond "self service", we provide the ability to engage leading class resources for an additional fee to help manage projects, drive productions, generate custom reporting, and review data as needed on an ad-hoc basis.

The Power of Deloitte Discovery

One Solution, All Your Requirements

A secure, modern, scalable eDiscovery platform that provides everything you need for matters ranging from business as usual to bet the company, in a secure cloud environment and supported by an experienced provider.

Reduced Costs, Long-Term Value

Bundled pricing model designed to flex with the variable nature of Discovery; Scale matters up or down without incurring unnecessary expenses, **easily predict Discovery spend over an extended time period**, and execute small projects more cost-effectively without fixed overhead associated with projects.

Global Access, Local Support

Confidently respond to large and/or cross-border requirements, including non-US government regulatory agencies and court systems, with a dedicated support team and standardized processes designed to drive efficiency and quality.

Our Experience

With 300+ Relativity-certified practitioners, a global strategic alliance, 10-year working relationship as a Certified Partner and 20+ years serving leading companies, Deloitte brings eDiscovery process and technical capability to the Relativity platform. From day-to-day requirements to migrations to the most complex matters, Deloitte is ready to help you execute to achieve your desired outcomes.

ABOUT

About Relativity

At Relativity, we make software to help users organize data, discover the truth, and act on it. Our e-discovery platform is used by thousands of organizations around the world to manage large volumes of data and quickly identify key issues during litigation, internal investigations, and compliance projects. Relativity has over 180,000 users in 40+ countries from organizations including the U.S. Department of Justice, more than 70 Fortune 100 companies, and 198 of the Am Law 200. RelativityOne offers all the functionality of Relativity in a secure and comprehensive SaaS product. Relativity has been named one of Chicago's Top Workplaces by the Chicago Tribune for nine consecutive years. Please contact Relativity at sales@relativity.com or visit www.relativity.com for more information.

About Deloitte

Deloitte helps organizations navigate business risks and opportunities—from strategic, reputation, and financial risks to operational, cyber, and regulatory risks—to gain competitive advantage and become more trustworthy, resilient, and secure.
