

Secure Learning Experience Platform™

Future-proof employee training and development

Your talent needs the right skills to grow. Empower them at scale.

Many organizations have limited capacity to onboard, train, and sustain their workforce with critical skill-building. But many face heightening pressure to help employees keep up with new technologies, evolving mission requirements, and industry certifications. A lack of adequate workforce development can introduce enterprise risk and put unreasonable pressure on staff and their ability to meet performance expectations. Today, organizations that promote a culture of continuous learning can more easily scale, adapt, and compete—and importantly, foster satisfaction in the workforce.

Training and development should never be a barrier to growth. With Secure Learning Experience Platform™, your talent can unlock curated skills and in-demand knowledge at the speed of your mission.

Enhances training program delivery and workforce development

Secure Learning Experience Platform™ is an innovative **cloud-hosted SaaS platform for hosting, delivery and tracking of training programs and workforce development**. The solution can be deployed as a simple learning management system, or as a full-featured learning experience platform tailored to individual users. The system can scale to accommodate over one million users.

Delivers learning experiences at lower costs with better customized approaches

The platform is designed to deliver greater value to the organization at a **lower operating cost and lower implementation burden than other learning platforms** in the market. It excels in the areas of UX/UI, learning management/data architecture, and business workflows resulting in total managerial empowerment and high end-user satisfaction.

Leverages advanced administrative controls

The platform is **compatible with most identity providers and SAML single sign-on**, including mixed authentication and multi-domain umbrellas, and can accommodate external user groups. **Multi-tenancy support allows for multiple domain deployments, each with their own branding, authentication configuration, and URL, yet managed under a single administrator console**. The platform supports rapid scaling and agility for future training programs and business units.

Secure Learning Experience Platform™ (SLXP) key features

Common platform

- Creates a **smooth user-centered experience** that can be integrated with virtually any other application or system of record
- Enables user communities to access simultaneously to **support each group's specific training and information needs with distinct user interfaces and journeys**

Reporting and monitoring

- Provides the ability to **track enrollment and monitor completion and effectiveness** of learning programs
- Offers **advanced analytics and custom reporting** for all material interaction, learner records, performance, and other training and business data

Role-based access

- Integrates single sign-on with **internal** and **external** users, including account self-provisioning and/or self-registration
- Offers **role-based and permission-based** access controls to streamline user experience

Dynamic content management

- Simplifies **content management in a centralized location** to deliver content to the right audiences at the right time
- Distributes current information and content immediately with **version control**
- **Alerts and prompts audiences** via email when new materials and training requirements are published or impending
- **Engages users** with ongoing announcements, forums, and knowledge resources across user communities

Security

- Protects data through hosting in a **secure environment** on Amazon Web Services (AWS) with annual SOC 2 audits
- Uses **FedRAMP Moderate** with Government Community Cloud deployment model (coming in 2025)
