

AI Readiness & Management Framework

Deloitte's AI Readiness & Management Framework (aiRMF) outlines the key activities and focus areas needed to implement and mature AI across the enterprise.

aiRMF consists of nine integrated AI capabilities aligned into three functions that depict when and how an organization might engage with each capability. These functions are not intended to be prescriptive stages or a linear journey; rather, organizations can implement capabilities across functions according to their unique context and objectives.

Navigating Your AI Journey

Deloitte's integration of transformative AI capabilities enables organizations to achieve AI readiness and maturity based on specific mission or business needs.

Through the AI Readiness & Management Framework we help organizations assess where they are, define target outcomes, and chart a path forward.

Proven End-to-End AI Capabilities & Services*

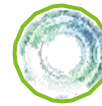

Deloitte applies AI with a human point of view to allow public organizations to expand their abilities and advance their mission.
