

# NGT Academy

Supporting advanced therapy companies at all stages through custom strategic and educational offerings

## What are advanced therapies?

1. Cell-based therapies (autologous & allogenic, stem cell, tissue engineering)
2. In-vivo gene therapies (gene editing, RNA, CRISPR, viral vectors)
3. Therapeutic vaccines (mRNA vaccines, mRNA cell therapies)
4. Synthetic biology (designer molecules, enzymes, organisms)
5. Radio-therapeutics (radionucleotide-based precision therapies, radioisotopes, radiosensitizers)

## What is NGT Academy?

NGT Academy provides industry leading practices, education, and thought leadership on specific topics of interest at each stage of an advanced therapy company's lifecycle. We deliver low-cost, high-value services primarily through customized virtual courses and immersion labs ranging in duration from 1 hour to full-day with the ability to facilitate in-person, virtual, or hybrid environments.

## Topic areas to explore

NGT Academy combines industry-leading advanced therapy experience with Deloitte's cross-functional network of Consulting, Tax, Audit & Assurance, and Risk & Financial Advisory to provide holistic solutions. At each stage in a company's lifecycle, we offer support to help them grow. We offer immersion labs on topics including:

- ✓ Advanced Therapy Overview
- ✓ Commercial Launch Readiness
- ✓ Financial Integration & IPO Readiness
- ✓ Patient and Product Journeys
- ✓ Tax & IP Strategy
- ✓ Advanced Therapy Operating Model
- ✓ Digital Enablement
- ✓ CDMO Strategy
- ✓ Chain of Custody/Chain of Identity
- ✓ Site Selection & Qualification
- ✓ Advanced Therapy Global Network Strategy
- ✓ Custom labs tailored to your pipeline and challenges
