

5 steps to managing sustainability reporting

1

Sustainability measurement

- Set up/refresh ESG KPIs and metrics baseline
- Track initial state/initiative progress
- Disclose ESG metrics internally and externally

2

Vision alignment

- Research on the industry trends
- Identify the key focus areas
- Document the ESG vision statement

3

Target setting

- Set financial and non-financial goals for ESG metrics
- Work collaboratively and assign responsibilities

4

Initiatives planning

- Plan initiatives to align with vision
- Set up data generation process

5

Initiatives execution

- Leadership support on the agenda
- Clear messaging across the organization
- Monitor deviations and take corrective steps
