Deloitte.
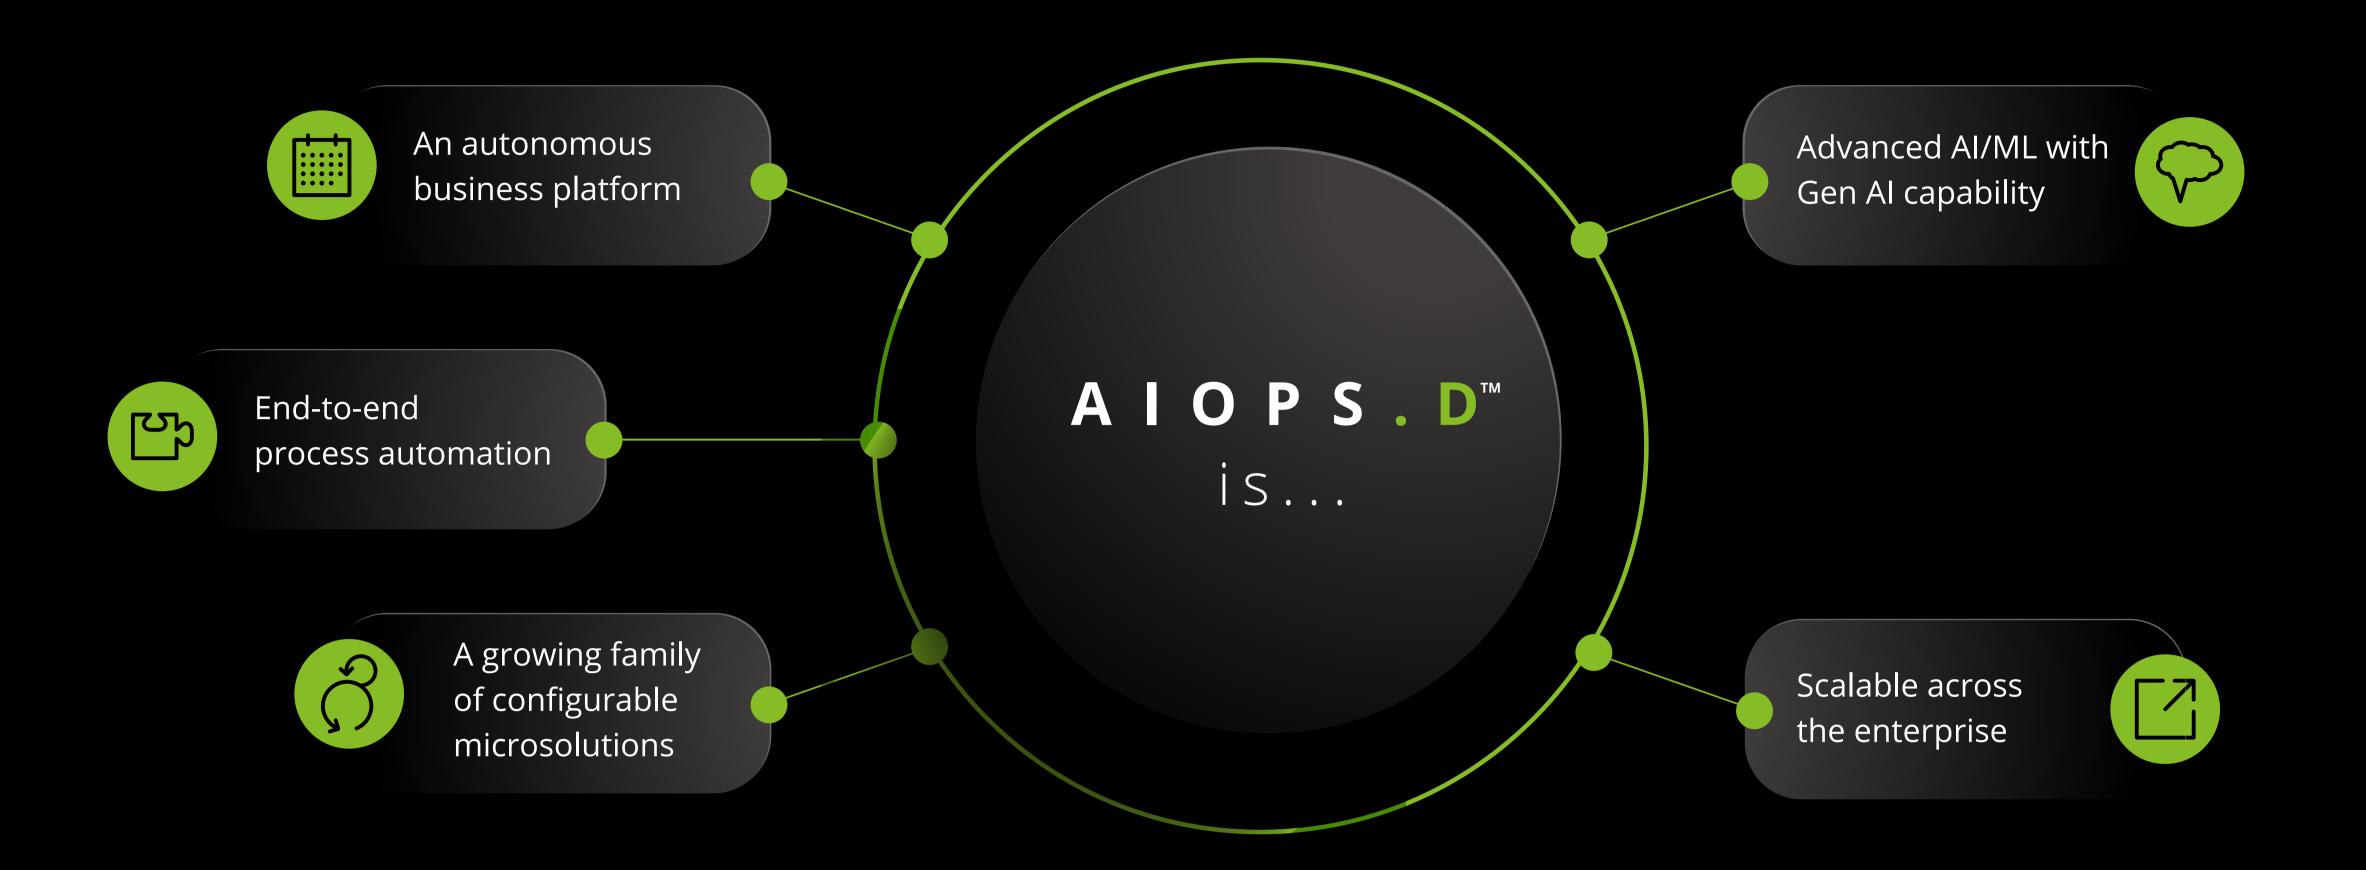

AIOPS.D™

a Deloitte Business

Evolve From Automated to Autonomous

Fully integrate with ERP platforms to enable autonomous business processes.

AIOPS.D™ is...

- An autonomous business platform
- End-to-end process automation
- A growing family of configurable microsolutions
- Advanced AI/ML with Gen AI capability
- Scalable across the enterprise

AIOPS.D™ Delivers Value

1 — Simple
Performs critical business functions using a single platform that reaches disparate ERP systems, driving simplicity through connectivity and completeness.

2 — Efficient
Orchestration of end-to-end business processes creates further efficiency by using trained AI/ML models to perform comprehensive tasks.

3 — Autonomous
The streamlining of day-to-day operations enables reduced risk and reimaged work and unlocks the value of autonomous business operations.

AIOPS.D™ AI-Fueled Business Process Areas

Autonomous Source to Pay
Improve spend visibility and management, compliance, and supplier onboarding while mitigating risk

Autonomous Data Operations
Bring validated, intelligent, and trusted data governance to your organization

Autonomous Finance
Enhances data accuracy and reduces reconciliation errors by up to 75%, ensuring reliable financial reporting

Reduces financial close cycle times by 2-4 days, allowing quicker access to financial insights

Autonomous Quote to Cash
Enable end-to-end revenue and subscription management with real-time customer insights

A I O P S . D ™

a Deloitte Business

A Unified Platform for Ecosystem Orchestration

Outcome-as-a-service offerings optimize priority business operations like Procurement, Finance, and Supply Chain from end-to-end. A unified platform approach to modular microsolutions enables deployment of full-service enterprise AI applications at scale.

Four Foundations of **A I O P S . D** ™ Elevate the Human Experience:

Autonomous Operations
Decision-making with minimal user input

Touchless Transactions
Human intervention on an exception basis

Human-Centered Work
Advanced user interfaces boost productivity

Ecosystem Orchestration
Access a broad range of ERP and non-ERP applications

A I O P S . D ™ is . . .

- An autonomous business platform
- Advanced AI/ML with Gen AI capability
- End-to-end process automation
- A growing family of configurable microsolutions
