Managed Services

Managing cloud for you—with you

Unleashing the power of Google Cloud

As a Google Cloud Managed Service Provider (MSP), Deloitte can help you achieve maximum impact—working with you to build, manage, operate, and nurture your cloud environment. The benefit? End-to-end services that support a more strategic and efficient approach to cloud—allowing you to focus more on your business.

Starting the managed service provider journey

Deloitte's systematic approach means we can help you take the right steps in the right order—with security and cost optimization at the forefront. And it's all rooted in a methodology for defining a Google Cloud journey specific to your business needs.

Discover
Understand where you stand, where you want to go, and what is possible.

Design
Create an environment that aligns with your business goals, and with a clearly defined roadmap to help you get there.

Deploy
Deliver the technologies, services, and capabilities that allow you to thrive with Google Cloud, whether the project is contained in Deloitte's environment or yours.

Operate/Manage
Run, service, support, and augment the complete cloud environment.

Seeing the possibilities. Making it work.

You start with a vision, translate it into a strategy, and end with results that match it—if you make effective choices along the way. When Deloitte helps you maintain, enhance, and support your extended Google Cloud ecosystem, we work side by side with you across every step of that journey.

Infrastructure management
We handle provisioning to establish an environment that satisfies Deloitte and Google Cloud's leading practices and adhering to defined service levels in managing your systems.

Service management
We review alerts and manage incidents with professional monitoring around the clock—so you don't have to.

Application management services
We cover your critical business applications with application development, maintenance, and operational support.

Automation and DevOps
A flexible framework helps deploy full-stack solutions more quickly so your business can operate more efficiently and innovate more readily.

Cyber security
We accelerate deployment of security configurations, processes, and policies—so you can get up and running (and stay running) with full-cycle security.

Risk and compliance
Our Compliance Risk Management framework standardizes design, assessment, implementation, and continuous improvement across your cloud journey.

Optimization, analytics, and transparency
A holistic view into your cloud landscape, informed by empirical data on usage and consumption, helps fine-tune solution footprints for better performance.

Deloitte's Google Cloud value

- Infrastructure management
- Service management
- Application management services
- Automation and DevOps
- Cyber security
- Risk and compliance
- Optimization, analytics, and transparency

Focusing on big benefits
