

Deloitte Cyber Services

The path to Platformization

Streamline your cybersecurity footprint

Platformization bridges the gap between rapid tech evolution and cybersecurity efficiency, driving a market shift toward simplified, integrated cyber solutions.

As enterprises face an increasingly complex technology and threat landscape, Platformization is emerging as a strategic response—enabling your organization to streamline its cybersecurity footprint by adopting integrated solutions from leading vendors, while helping to improve governance and reduce costs.

Deloitte is ready to guide your platformization journey—helping you future-proof your cyber capabilities and achieve operational excellence through a single pane of glass.

Potential benefits of Platformization

Primary benefit: Enabling a future-ready cyber organization while optimizing technical investments and streamlining the workforce.

Cohesive architecture

Minimized personnel dependency

Future-ready technology

Unified pane-of-glass view

Enhanced cyber maturity

Improved governance & reporting

Market drivers and trends

According to Gartner, Inc. “**Complexity is the enemy of security**; yet the average organization works with 10 to 15 security vendors and **60 to 70 security tools**. And many of these products have similar capabilities, making it easy for misconfigurations to occur and difficult to uncover security gaps and integrate the products.”¹

“Consolidating cybersecurity products **reduces this complexity by streamlining the number of products and their interactions**, thus improving efficiency of security outcomes.”²

In tandem, software suppliers are expanding their security capabilities to deliver **platform-based, integrated cybersecurity solutions** and bundling their offerings with an ambition to become a **one-stop shop for all security needs**.

“**The market will reach \$294 billion (current currency) in 2028**, with a CAGR of 11.7% from 2023 to 2028 in constant currency and 12.6% in current USD”. “By 2028, **45% of organizations will use fewer than 15 cybersecurity tools** in their product portfolio, from 13% in 2023”.³ Together, we believe, this reflects organizations’ willingness to invest in these solutions.

The Deloitte difference

Beyond technology transformation

Trusted partner to guide through all aspects of your transformation journey including technology, supporting processes, operating model, and workforce re-alignment as you transition to platforms.

Strategic technology relationships

Strong relationships with all major platform vendors enabling deep understanding of the technologies and demonstrated through a highly specialized resource pool and co-developed integration tools.

Customized Deloitte solutions

Industry & sector specific platform solution and assets tailored to meet the nuanced regulatory, functional, and operational requirements of different markets.

How we can help

Immersive labs that let security leaders test platform strategies in real-world scenarios.

Tailored **platform strategy and investment roadmaps** that help you unlock the full business value of cybersecurity Platformization.

Hands-on **implementation pilots** that show how new platforms will fit within your technology stack.

End-to-end support for a **seamless transition and migration** to integrated platforms.

Always-on security **operations and ongoing cyber modernization.**
