Buy or build?
Have the best of both worlds.

BankingSuite Experience is an industry-leading UX platform shaped by the best of Deloitte Digital's human-centered design expertise. We deliver 80% of the development effort for your digital experience, leaving 20% for you to build the unique, differentiating features that make it 100% your own.

Build
Where you shine

The differentiated part of your experience

Buy
The technical foundations

All the modern experience standards your digital first customers expect

Shaped by Deloitte Digital's human-centered design expertise

Build an experience that matches your vision

1: Get started quickly

Deploy better, smarter capabilities; frictionless journeys; and omni-channel experiences quickly. We built more than 300 screen templates you can access out of the box, thoughtfully orchestrated into journey flows that allow your customers to self-service across all areas of the bank. Our Figma to Flutter integration collapses the design to development timeline considerably.

2: Customize to differentiate

Our existing journeys and pre-built Flutter components can be customized to create experiences that are right for your brand. Once you are happy with the configuration in Figma, the design is automatically translated into .JSON files, saving you hours of development effort. If you want to customize even further, you can take our product framework and extend it.

3: Take genuine ownership

BankingSuite Experience helps you retain ownership of the features you build. Plus, we give you full control of the backend platform—even the code—so you don't have to wait for a third party to make updates. Direct your own release schedules and shape the product road map around your priorities. No matter how much control you want, we are here to help throughout your journey.

Benefits for your business

- **Power back in the hands of your designers and tech teams**
- **Extensibility and consistency across segments and channels**
- **A lower-cost way to build and maintain your digital experience**
- **Differentiation where it matters to grow**
