IntelligentOps™

Overview

IntelligentOps™: Decision intelligence and execution for supply solutions

*Unlock exponential value across supply operations
with AI-driven decision-making and orchestrated execution
on a unified foundation built on decades of proven enterprise delivery*

Deploy purpose-built solutions designed and built by industry professionals – to empower your workforce with intuitive, context-aware AI embedded in the flow of work.

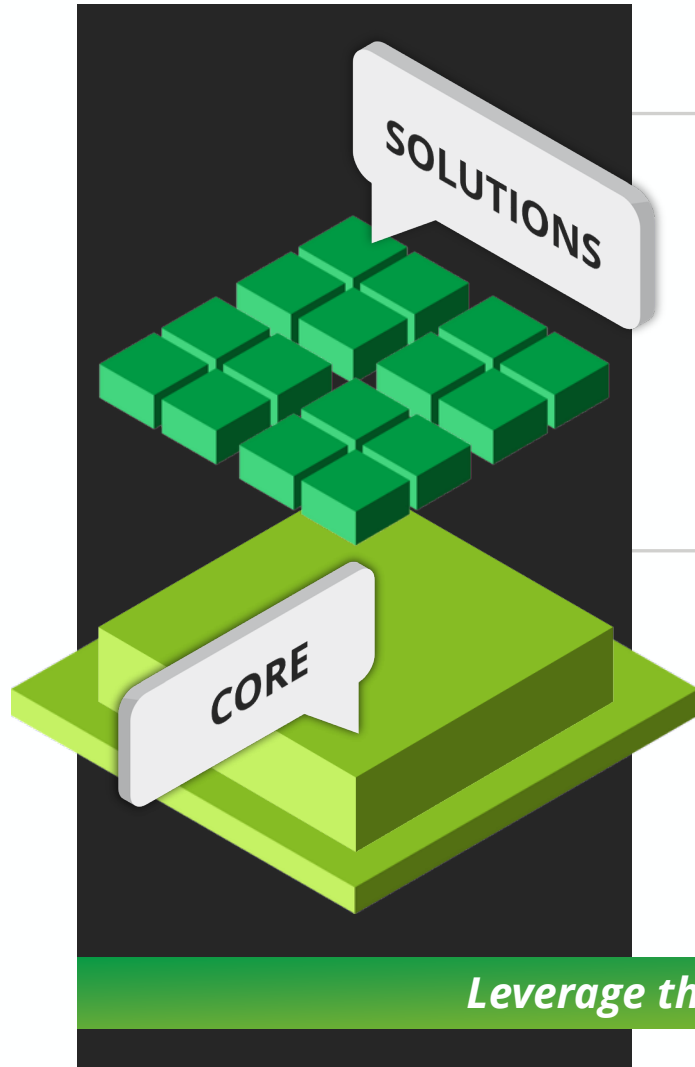

Enhance and automate with agentic AI, embedded with industry leading practices and powered by a unified data foundation that is integrated into your existing tech ecosystem.

Scale outcomes and value by deploying connected supply solutions on a common decision platform, purpose-built for your industry and your operations.

Jumpstart time to value with an agentic-native platform that accelerates the build, deployment, and scale of new intelligent supply solutions. Pre-built capabilities include:

- ✓ Product Engineering and R&D
- ✓ Manufacturing & Operations
- ✓ Tailored Solutions: Build new or customize existing solutions to fit your unique needs
- ✓ Planning
- ✓ Aftermarket Services
- ✓ Direct Materials
- ✓ Cross Supply Chain

Meet IntelligentOps: an AI-powered platform to deliver end-to-end decision orchestration across supply

IntelligentOps solutions power decision-making, execution & orchestrated action

Production-ready AI agents

Domain-infused AI agents bring observability and drive execution to accelerate value

Tailored, fit-for-purpose solutions for your organization

IntelligentOps enables rapid customization, development, and onboarding of supply solutions leveraging its core elements – without starting from scratch

Orchestrated workflows that deliver outcomes

IntelligentOps is embedded in the flow of work to align teams across the supply chain – from planning, procurement, manufacturing and warehousing

Unified decision intelligence foundation enables leading organizations to cost-effectively build and scale capabilities globally

Enterprise-grade foundation & unified data architecture

A secure, production-ready platform that standardizes and contextualizes IT and OT data across systems with a connected knowledge graph, integrating effectively with existing systems and accelerating time to value

Democratized AI, Agentic AI runtime & workflow orchestration

A managed multi-agent framework and event-driven workflow engine turn operational data into controlled, human-in-the-loop execution across planning and operations; while agentic BI capabilities enables “no code” analytics

Governance, security & operational resilience

Built-in identity management, AI governance, and enterprise-grade reliability help ensure compliant, observable, and resilient deployments at scale across business units and regions

Leverage the power of a pre-built core extended with tailored supply solutions
