ASCEND IN ACTION

Packaged Technology

A top health system embarks on an ERP transformation.

Challenge

The client was operating with fragmented finance, supply chain, and HR systems that limited efficiency, transparency, and scalability. Inconsistent processes and legacy platforms made it difficult to standardize operations, enable automation, and deliver a modern user experience.

Solution

Deloitte implemented Ascend with Oracle Cloud ERP and HCM to unify the client's core business functions on a single, integrated platform. The program standardized end-to-end processes, embedded automation and security, and included change management and Operate services to support adoption and long-term optimization.

Impact

The transformation created a single source of truth across the organization, reduced manual effort, and improved operational efficiency and financial visibility. Employees gained a more intuitive experience, while the organization increased agility to support future growth and innovation.
