SNOWASSIST FOR PUBLIC SECTOR SNOWFLAKE ADOPTION

A governed Generative AI assistant that accelerates Snowflake value for public sector organizations grounded in enterprise policies, standards, and architecture

THE ADOPTION CHALLENGE: MOVE FROM VISION TO VALUE—FASTER

Public sector leaders and teams face a dual challenge: advance enterprise data, analytics, and AI priorities while needing to integrate with policies, security standards, architectures, and data strategies. Doing that quickly, and without inconsistent guidance or rework, can be hard.

SnowAssist is a Generative AI (GenAI) assistant designed to help teams connect their goals and requirements to Snowflake capabilities, so they can move from intent to informed action faster.

CONTEXT-SPECIFIC SNOWFLAKE GUIDANCE THAT'S TAILORED TO YOUR ENTERPRISE

SnowAssist is an interactive GenAI enablement platform for public sector organizations. It helps teams apply Snowflake's governed data and analytics capabilities to real-world needs enabling secure sharing and AI-ready insights beyond feature learning. It can ingest context documents, including requirements, policies, security standards and data and AI strategies to tailor guidance to your environment and priorities.

Teams that use SnowAssist can:

1 Align stakeholders faster on priority use cases and outcomes for Snowflake

2 Identify which Snowflake capabilities and patterns best support enterprise goals, such as governance, interoperability, and AI enablement

3 Get targeted, document-aware Q&A and scenario analysis grounded in agency/program context

A TRUSTED APPROACH BACKED BY DELOITTE AND SNOWFLAKE

Drawing on Deloitte public sector qualifications and experience, SnowAssist incorporates sector-specific terminology, compliance considerations and public sector scenarios. It's integrated with Snowflake's official documentation, so answers reflect current Snowflake capabilities and architecture guidance.

Governed GenAI on trusted references: When appropriate, SnowAssist helps users find, understand and apply governed information faster by grounding responses in approved documents and Snowflake documentation. This helps teams move quickly while supporting oversight expectations in public sector environments.

HOW WE HELP TEAMS MOVE FASTER WITHOUT LOSING CONTROL

Deloitte can help you put SnowAssist into action with a rollout and enablement approach that fits your organization, such as curated scenario libraries, role-based learning journeys, and governance-aligned onboarding paths to drive adoption and improve consistency. SnowAssist can serve as a primary entry point for Snowflake Q&A, decision support, and guided enablement.

USE CASES IN ACTION: WHAT SNOWASSIST CAN SUPPORT

Executive and program decision support:

Use SnowAssist to explore how Snowflake can advance your organization's data, analytics, and AI priorities, grounded in your policies, standards, and strategy, when you only have limited time to evaluate options.

Requirements/policy-driven Q&A:

Upload internal or external reference documents such as requirements, policies, architectures and strategies, and receive document-aware, context-specific answers.

Architecture and integration planning:

Help enterprise architects and platform leaders identify Snowflake-aligned patterns and considerations for integrating into the broader data platform and operating model, based on current-state and target-state materials.

Readiness and adoption coaching:

Powered by Snowflake Cortex large language models (LLMs) to enable document-grounded Q&A, realistic scenario walkthroughs, and actionable coaching feedback to improve consistency and reduce rework.

TURNING ENABLEMENT INTO ADOPTION

By combining enterprise-aware guidance, Snowflake-aligned documentation, and Deloitte's delivery experience, SnowAssist can help public sector organizations accelerate adoption, improve consistency, and progress data and AI priorities more effectively from day one.

SnowAssist is available via AWS Marketplace to simplify procurement and accelerate deployment.

Schedule a short working session to align on priority use cases, required documents to ingest and a right-sized pilot.
