Deloitte Global 2025 Gen Z and Millennial Survey

Country profile: Colombia

Methodology and global key messages

Deloitte's Global Gen Z and Millennial Survey, now in its 14th year, examines the factors shaping the worldviews of **23,482 Gen Z and millennial respondents across 44 countries**. The results reveal a cohort of young professionals who are rejecting traditional rules and antiquated structures in their pursuit of career satisfaction—and ultimately, happiness.

Gen Zs and millennials are ambitious. But for them, success is not necessarily about climbing the corporate ladder. Learning and development is a priority, and they expect their employers to provide these opportunities. Some have foregone higher education to pursue the practical skills that trade or vocational training provides. And as technology transforms the world of work, Gen Zs and millennials are enhancing their knowledge and embracing new tools, such as GenAI.

These generations are seeking more than just a job. Making money is important but so is finding meaningful work and well-being. They are looking for careers with the right balance of these factors, a "trifecta" that can be hard to find.

They have high expectations for their employers, and they often job hop to meet their career ambitions in a world where the social contract between employers and employees has eroded. Many feel their managers are not meeting their needs. Some believe that companies are not doing enough to address workplace stress. And most are feeling the pressures of the cost of living.

The findings demonstrate the need for organizations, senior leaders, and managers to create environments where workers can not only attain the trifecta of *meaningful work, financial security, and well-being*, but also achieve the professional growth they are looking for. By supporting these pillars consistently, organizations can uphold the social contract and create a cycle of satisfaction, engagement, and success.

Among this year's key findings:

Learning and development is a top priority, but many feel their managers are missing the mark

Soft skills are vital as GenAl transforms work

Money, meaning, and well-being intersect to form the foundation for happiness at work

Supporting employee well-being should start with addressing the root causes of workplace stress

Environmental concerns continue to influence Gen Z and millennial behavior

The following deck examines how Colombia's Gen Zs and millennials stand out from their global counterparts on these key themes.

Our methodology

The 2025 Gen Z and millennial Survey solicited the views of 14,751 Gen Zs and 8,731 millennials (23,482 respondents in total), from 44 countries across North America, Latin America, Western Europe, Eastern Europe, the Middle East, Africa, and Asia-Pacific. Fieldwork was completed between 25 October and 24 December 2024.

As defined in the study, Gen Z respondents were born between January 1995 and December 2006, and millennial respondents were born between January 1983 and December 1994.

Country profile: Colombia
